#### DANBY FUN DAY SEPTEMBER 23

The Danby Fun Day Committee has announced the date for the year's premier community event. Danby Fun Day will take place on Saturday, September 23, 2017, from 10am to 2pm, on the grounds of the Danby Volunteer Fire Company in beautiful downtown Danby.

Fun Day has been the centerpiece of the summer season for several decades. Over the years, it has featured a parade, two music venues (acoustic and amplified) showcasing local musicians, games for kids, a chicken BBQ and other culinary treats prepared by the fire volunteers, craft vendors, educational safety demonstrations created by first responders, a used book sale, archery instruction, a huge Chinese Auction, local history displays, and the opportunity for Danby's residents and others to meet and get to know each other.

The event is also one of the major fundraisers--and volunteer recruitment moments--for Danby's Fire Departments. Visitors can tour the Fire Station, see the fire trucks, and talk to the friendly volunteers.

The event committee is still looking for additional volunteers to help, both before and during Fun Day. Call 607.272.8114 and leave a message if you'd like to help!

The Danby Volunteer Fire Company is located at 1780 Danby Road, also known as NYS Rt.96B, about 6 miles from the Ithaca Commons, past Ithaca College. For more information, call 607.273.8678 or email fundayinfo@danbyny.org.

For Home, Auto, Life and Business.

THEN WE SEE THE NEW York State Fair in full bloom, we all know that summer is quickly coming to a close and with it, the end of the warmer temperatures. Knowing we have but a short time to get the exteriors of our homes and businesses sealed up and ready for the 7 months of colder weather to come, the time to act is right now.

So, what are some of the things you should be doing to prepare for the coming colder weather? Here at Old School Artisan, we believe it's best to start with those projects that will not only protect your investments, but help save some money too! Let's start at the top and work our way down.

> First, we recommend you have your roof inspected, repaired and or replaced if necessary. With an average of 9' of snow per year in the central New York area, keeping the water, snow and ice outside where it belongs is paramount. Replacing broken or missing shingles and repairing deteriorated valleys, is a good place to start. Even the simplest thing like moss build up,

which impedes water shedding from your roof, should be addressed. Check and seal your ridge vents and the plumbing pipe and exhaust vent penetration flashings. A cracked and deteriorating chimney is a probable leak, so pointing the bricks and replacing the flashing will be important. Be sure you get those gutters and downspouts repaired and cleaned as directing water away from your building is always a good thing. Perhaps the biggest action you can take to prevent leaks in your roof, is to be sure you have enough insulation and proper ventilation in the attic, which will go a long way to cure leaking caused by the buildup of ice at the eaves or "ice damming" as it were. In our 43 years in the construction industry, we have yet to find a building with too much insulation!

Seal up those windows and doors! Sometimes all it takes is a little caulk around the perimeter of the openings in the walls of your building. Check to be sure your windows all close, seal and latch properly. In this day and age, window replacement is very cost effective especially when considering heat loss caused by those old, drafty windows. Doors should have the hinges and locksets checked and tightened and the sweeps at the bottoms adjusted and or replaced if necessary. It's a good idea to seal around the dryer vent and water spigots too. Last but not least, make sure your basement windows are up to snuff and sealed properly.

There are many things to consider when contemplating the coming cold season beside keeping the cold out, like the amount of time we will be forced to spend inside! The time to get that family room in basement or the "man cave" in the garage ready for the long winter use is here. There will be much more cooking, eating, and entertaining done inside too, so getting that old, inefficient kitchen remodeled is something to be undertaken soon as well.

If being on a ladder or roof is not your cup of tea, or remodeling the basement or kitchen is beyond your expertise, we understand, which is why you need only pick up the phone and give us a call at 607-745-9900 or 315-447-7220. We are Cortland's oldest and most trusted general contracting firm and are ready to do all we can to help protect your homes and businesses and minimizing those winter blues. #### **MIKE'S FISH TANK HERMIT CRABS**

HERMIT CRABS ARE AN TO PROPERTY PROPERTY OF THE PROPERTY OF TH TERMIT CRABS ARE AN EASY pet to care for and they are a very

A lot of people will go on vacation to the beach and bring back hermit crabs. I have been selling hermit crabs for 26 years and I have learned a lot from the big distributors about these cute

They do not eat very much so feed accordingly. I put a little warm water in the sink and sprinkle some hermit crab food around the edge of the water. This simulates the way the crabs eat around and near water. It also keeps your hermit crab home cleaner, because when they are done eating, you can just add water and swish any leftover food down the drain. In the winter you can add a heat lamp or undertank heater to be sure the hermits are warm enough. This time of the year, it is warm enough and you shouldn't need any heat sources.

Be sure to keep a dish of water in their home, they need moisture. If they don't have enough humidity, they will have a hard time shedding their skin and they can die. They make hermit crab sponges. Keep one of these wet in your crabs home all time. This will add humidity to the habitat and will benefit your hermit crab. Normally hermit crabs get along with each other but they do fight sometimes. You might find a loose claw here and there, a definite sign that they may be fighting. Remember they are called HERMIT crabs, hermit means alone, so if you see signs of fighting, you may need a bigger home or take out the crab who might be the fighter.

Once a week give your crab a warm bath in just a little bit of water in the sink, this will help keep his skin moist and aid him in shedding. They paint hermit crab shells with pictures and colors so they look really cool.

Another fun fact of hermit crabs is if you add shells to their home, they may change into those shells off and on.

It all depends on whether they like the shells you give them, but it is cool to watch them change from one shell into the next. They make a big variety of hermit crab foods and treats. A balanced diet is always a good thing.

If you want to put a branch or stone from outside into your crabs home, be sure to sterilize it with boiling water so it's safe for your hermit crab.

Go to our web site www.petsaplenty.biz. You will find care sheets for hermit crabs.

Pets A Plenty is located in the Blockbuster Video Plaza, Rte 281 Cortland, 753-9213. Open 7 days a week. We now have a website. WWW. PETSAPLENTY.BIZ. check it out. I post care sheets, coupons, new animal arrivals, contests and more. Any questions, email me at friskyy@hotmail.com
