A FAMILY TREE WITH **DEEP ROOTS**

HUTE'S WATER SYSTEMS AND SHUTE'S LaFayette Well Drilling has been a family-run business serving Central New York for more than 50 years, drilling wells, installing pumps and treating problem water.

Originally known as LaFayette Well Drilling, established in 1963 by Howard Shute, and brother-in-law, Warren Shetler, both the business and their reputation grew over the years. Shute continued on with the business after Shetler decided to

Shute was then joined by his sons, Mark, Neil and Scott. Howard Shute retired at nearly 80 years of age while his sons continued the family tradition of providing safe and pure water to the community.

Today, Shute's Water Systems is run by Scott Shute and Matt Farkas, and Shute's Excavation is run by Todd Shute. Scott's wife Becky runs the office with Mark Shute's daughter Jill. The family attributes the majority of its continued success from recommendations it receives from satisfied customers.

Shute said many municipal water systems contain calcium and magnesium, which as "hard" substances, form scale and create problems in water heaters, dish washers and plumbing

Water purification can include the removal of iron, sulfur, chlorine and bacteria in a chemical-free process. Softening the water is also important and has many benefits, not only for family members, but for plumbing systems and appliances

"Uncontaminated water is essential for good health," Shute said. "Foul-smelling or unusual odors from your water should make you question your water's quality and safety."

Many families throughout Central New York use well water as a source of drinking water and for all its household needs. Unfortunately, water containing hydrogen sulfide gas has a distinctive "rotten egg" odor which is especially noticeable when running hot water.

Shute said the danger lies in a gradual chemical reaction

"Hydrogen sulfide gas will corrode plumbing metals such as iron, steel, copper and brass, and the exposed metal parts in appliances such as dish washers and washing machines" Shute said. "Also, corrosion of iron and steel pipes from ferrous sulfide, or 'black water,' that can darken everyday

tableware, discolor copper and brass utensils and alter the appearance and taste of cooked foods."

Additionally, Shute said, sulfur water can make washing clothes more difficult.

Shute's Water Systems can assure customers that these hazards and more can be avoided or remedied using its timetested, ecological systems

Shute's offers a free water analysis that will help lead to greattasting and healthy water from the tap. Located in LaFayette, Shute's Water Systems can be reached at (315) 677-5552, or visit ShutesWaterSystems.com.

CREATURE FEATURE SNOW GEESE

PRING IS COMING! IT'S TIME to keep our eyes and ears Open for migrating snow geese passing overhead in huge, noisy flocks. They are on an incredible journey north to the Alaskan and Canadian tundra, where they breed and nest in colonies. During their odyssey, they stop to rest and feed in wetlands, spacious fields and agricultural tracts or on frozen lakes. It's an explosive visual and auditory experience to encounter hundreds or even thousands of snow geese taking off.

Snow geese have two color patterns. One is a "white morph," with a white body and black wing tips. The other type is called a "blue morph," where the body is gray-brown and any white feathers are limited mostly to the head. Flocks have individuals with both colorations. They choose life-long partners of the same color type as the family members they were raised with. With seemingly insatiable appetites, snow geese gobble up a broad variety of vegetation. They are excellent fliers and swimmers and can run fast enough to escape some predators.

Snow geese populations are growing quickly now, but between 1916 and 1975, hunting them in the eastern US was restricted over conservation concerns.

WELCOME TO CASKEY'S GARAGE SERVICING TOMPKINS AND CORTLAND **COUNTY SINCE 1976**

1990 Dryden Road Freeville, New York 13068 (607) 347-4170

caskeysgarage.com

THAT ONCE WAS A SMALL GAS station, has developed into a large heavy equipment garage today. Starting in 1976, Caskey's Garage was a one man show consisting of just Larry Caskey and his tools. Business, however, picked up and so did the need for more mechanics.

Over the next 44 years Caskey's Garage added on man power and square footage to its garage. We currently employ 21 people; we are a certified distributor for Volvo and Mack, as well as covering their warranties. We also offer repair service for all insurance claims too!

Caskey's Garage is your Cat on Highway Truck Engine Parts Source (TEPS) dealer. We are authorized to sell CAT Fluids, filters and overhaul kits (Bronze, Silver, Gold and Platinum). We can also offer extended coverage for overhaul kits as well as components.

In our parts room we have over 72 years of experience, Dennis Foley (38 years), Keith Patte (24 years) and our newest employee Ted Hall (10 years). These boys make sure we have all the parts we need for all makes of trucks including the parts that are under warranty.

Our service department has well over 150 years of experience in repairs for heavy and medium duty diesel and gas trucks including drivelines, AC systems, turned flywheels, brake drums and rotors, and they are all done in-house. We have a full wheel adjustment center and New York State Certified Inspections available for our customer service needs as well.

All in all, we have a very experienced shop running 5-1/2 days a week to try and keep up with our customers' repair needs for their vehicles while making sure they are done correctly and

We look forward to serving you!

Do a 10% water change once a month.

2 and a half and 3 and a half gallon tanks are very hard on fish. Betta fish are the best choice. Any tank under 10 gallons can be problematic.

Don't change the PH. Fish can adjust to a high PH, but not if you have to keep changing it daily. PH is high around here and most fish settle into it just fine.

If you are setting up a tank, go easy on fish the first 4 to 6 weeks. You need beneficial bacteria to grow and it takes time. So go slow.

MIKE'S FISH TANK HEALTHY AQUARIUM TIPS

A few steps to follow for a healthy aquarium.

Goldfish like it cold, Tropical fish like it warm, up around 78

Only float your bag of fish for 5 minutes, floating longer can kill them. There isn't that much water in the bag. It only takes a few minutes to equalize.

Go right home after buying fish. If tropical fish get cold, they will get sick.

Only add an algae eater when you see algae. They don't always like the algae wafers, so add when you see algae.

Feed fish 3 times a day, but small amounts. In the wild fish are eating off and on all day.

3D Mammography is Now Available at Guthrie Cortland Medical Center

Your very best defense against breast cancer is early detection. Mammograms continue to be the best screening method available.

3D Mammography, or breast tomosynthesis, is the best imaging technology for screening women with dense breasts or who are at high risk for breast cancer. Breast tomosynthesis is also beneficial to every woman as it can detect cancer more accurately at an earlier stage.

Unlike 2D mammography, which takes images in two views, 3D mammography takes multiple images from many angles. This allows the doctor to get a clearer and more comprehensive view of breast tissue.

Images created with 3D mammography (right) more clearly indicate the presence of a mass compared with the twodimensional image.

To make a screening mammography appointment call 607-756-3795.
