## A FAMILY TREE WITH DEEP ROOTS

SHUTE'S WATER SYSTEMS AND SHUTE'S LaFayette Well Drilling has been a family-run business serving Central New York for more than 50 years, drilling wells, installing pumps and treating problem water.

Originally known as LaFayette Well Drilling, established in 1963 by Howard Shute, and brother-in-law, Warren Shetler,

both the business and their reputation grew over the years. Shute continued on with the business after Shetler decided to pursue other interests.

Shute was then joined by his sons, Mark, Neil and Scott. Howard Shute retired at nearly 80 years of age while his sons continued the family tradition of providing safe and pure water to the community.

Today, Shute's Water Systems is run by Scott Shute and Matt Farkas, and Shute's Excavation is run by Todd Shute. Scott's wife Becky runs the office with Mark Shute's daughter Jill. The family attributes the majority of its continued success from recommendations it receives from satisfied customers.

Shute said many municipal water systems contain calcium and magnesium, which as "hard" substances, form scale and create problems in water heaters, dish washers and plumbing systems.

Water purification can include the removal of iron, sulfur, chlorine and bacteria in a chemical-free process. Softening the water is also important and has many benefits, not only for family members, but for plumbing systems and appliances too.

"Uncontaminated water is essential for good health," Shute said. "Foul-smelling or unusual odors from your water should make you question your water's quality and safety."

Many families throughout Central New York use well water as a source of drinking water and for all its household needs. Unfortunately, water containing hydrogen sulfide gas has a

distinctive "rotten egg" odor which is especially noticeable when running hot water.

Shute said the danger lies in a gradual chemical reaction

"Hydrogen sulfide gas will corrode plumbing metals such as iron, steel, copper and brass, and the exposed metal parts in appliances such as dish washers and washing machines" Shute said. "Also, corrosion of iron and steel pipes from ferrous sulfide, or 'black water,' that can darken everyday tableware, discolor copper and brass utensils and alter the appearance and taste of cooked foods."

Additionally, Shute said, sulfur water can make washing clothes more difficult.

Shute's Water Systems can assure customers that these hazards and more can be avoided or remedied using its time-tested, ecological systems

Shute's offers a free water analysis that will help lead to great-tasting and healthy water from the tap. Located in LaFayette, Shute's Water Systems can be reached at (315) 677-5552, or visit [ShutesWaterSystems.com](http://ShutesWaterSystems.com).

## MIKE'S FISH TANK TANK CLEANING

*Pets a Plenty*

*Rte. 281 Cortland (across the street from Grand Union)*

*GPS: 3925 West Rd. Cortland*

*Open 7 days a week*

*petsaplenty.biz • friskyy@hotmail.com • 607-753-9213*

**I**GET A LOT OF people who say they clean their tank and then the water gets cloudy and some fish die.

You never want to do a major cleaning of your tank. Never take your gravel out and clean it. There is a good bacteria that grows in your gravel, when you wash your gravel, that good bacteria dies. That bacteria eats the fish's urine. So if that beneficial bacteria dies, the cloud you see is the fish urine (ammonia). If the gravel has algae on it, just turn it over in the tank so that the algae gravel faces down and will die off when no light hits it. Too much light causes algae to grow. You can siphon as much as 80% of your water out, just leave the gravel with water on it so the bacteria does not die.

Remember to fill the tank back up with water the same temperature as what you took out, so the fish are not stressed.

Another thing I am asked a lot is putting fish away. Some people are still floating the bag for 10 minutes, add water from the tank into the bag, float 10 minutes again and add tank water to the bag. The Fish farms say this is not the case anymore.

Float your bag of fish no more than 4 to 5 minutes. Floating longer can cause your fish to die. The bag of fish does not have that much water in it, so a short float is all you need.

Ideal temperature for a tropical tank is 78 to 80 degrees.

## 2022 MARATHON MAPLE FEST

AFTER TWO YEARS OF PANDEMIC setbacks and hurdles, the 2022 Marathon Maple Festival propelled through the many hitches and stumbling blocks, and made the festival happen with a massive and favorable reception. Saturday's weather was remarkable and a record number of folks showed up to participate in the event. Attendees enjoyed watching the pancake eating contest, the many contests, the incredible anticipation and enjoyment of the pancake breakfast, as well as a host of other contests and contributions from many class groups and community members. And, of course, vendors from areas of craftsmanship set up in the school gym, the Civic Center, and school rooms to display their wares and contribute to the festival.

Each one of the high school class men participated in the festival, providing different foods and items for sale, to bring income to their class. The Senior Class mingled among the buildings selling chicken speedie subs, which were very tasty. The Junior Class circulated among the vendors and buildings offering their apple dumplings, which were deliciously warm and enjoyable, especially with the scoop of vanilla ice cream added to the dish.

And, of course, the Sugar Shack was a big hit with the event with maple syrup being offered from local businesses, and a display of maple syrup boiling and processing. Speaking with Silas Cooper from Cooper Hill Maple was very educating as to the process, as well as visiting with Floyd and Natalie from Millrace Maple Products. Both merchants process thousands of gallons of sap, boiling and processing into the delicious maple syrup we all enjoy every morning for breakfast.

One of the enjoyable events at the festival was the airboat rides. Two of the riders on the airboat ride were Jesse Keener and his girlfriend, Renee. Saturday's weather was a bit brisk, but the two enjoyed the exhilarating ride down the Tioughnioga River, not really paying much attention to the cold wind. Sadly, Jesse lost his new baseball cap to the wind in the ride, but said that it was worth the trip.
