McNeil Bldg 17 Main St., Suite 411 Cortland (607) 756-5691 Center Ithaca Bldg 171 E State St., Suite M03 Ithaca (607) 275-5700

YEAR END IS FAST APPROACHING, and most people have no idea where their business stands or how the tax law changes from the OBBBA passed by Congress a few months ago will affect their income tax liability.

In either QuickBooks Online or QuickBooks Desktop software applications, are your business bank accounts and credit cards reconciled through October? Are your business transactions categorized properly on your profit and loss statement and balance sheet? Are all your business credit card and loan balances reflected correctly with current principal balances and the interest expense portion of your debt payments posted on your profit and loss statement? Do you have enough income tax paid in to the IRS and New York State so you are not hit with a large income tax due on your tax return in April that you did not expect?

Too many business people put their bookkeeping on the back burner during the year and lose track of their income and expenses. If you do not follow a defined process that runs all business transactions through the business's bank account, it can be guaranteed that cash transactions and receipts are missing, and personal expenses are combined with business expenses throughout both your bank accounts and credit cards. If the books are not cleaned up and current, the time needed at critical tax deadlines to separate personal from business transactions comes at the worst possible moment. We accountants may be miracle workers at times, but we certainly need some healthy sleep from January to April!

Our in-house QuickBooks ProAdvisors can get your books straightened out now so you can get the advice you need on decisions to be implemented before year end that will lessen your tax liability for the current year. We have three bookkeeping service levels to keep your bookkeeping current from now on.

Equus Advisors provides professional business bookkeeping services for sole proprietors to partnerships and corporations. When your business's QuickBooks file contains a proper chart of accounts and all business transactions are captured and categorized properly, as accountants and advisors we can then provide you with insights and advice that has meaning to you and can be acted upon in a timely manner.

Please message us through the "Get In Touch" button at top right of our website at <u>EquusCPA.com</u> or call us at 607-756-5691 or 607-275-5700. Let us know about your business and answer questions that we have.

Before we provide a quote for our services, we need to view the current state of your books which can be done through our secure online portal. Thereafter, we will meet with you in person or through a video call. Our offices are located in the Center Ithaca Building on the Commons in Ithaca and in the McNeil Building on Main Street in Cortland.

HUTE'S WATER SYSTEM AND WELL Drilling has been a family-Operated business since 1963, when Howard Shute and his brother-in-law, Warren Shetler, first opened the business. Originally named Lafayette Well Drilling, Howard Shute carried the business alongside his sons; Mark, Neil, and Scott, and its reputation for many years until Howard Shute officially retired at almost 80 years. Scott Shute and Matt Farkas continue the effort of providing safe and clean water. The office is run by Scott's wife, Becky, and Mark Shute's daughter, Jill. Satisfied customer recommendations and glowing reviews are attributed to Shute's Water Systems and Well Drilling's success.

Now serving the CNY's areas, including Syracuse, Baldwinsville, Cortland, Cazenovia, Chittenango, Canastota, Fayetteville, Auburn, Tully, Lafayette, Marcellus, Manilus, Camillus, and Skaneateles. Scott Shutes mentions, "With

years of experience, our team will assess your needs and create a custom water system plan or repair that's right for you."There are tests to determine the specific needs of a customer, and the basic water analysis of hard metals is free. For a more detailed survey, called the Water quality indicators (WQI), there is the option to test for microorganisms and bacteria. Shute's Water Systems conducts the test, and the results are then sent to a lab. They stress the importance of well-testing as the lasting effects can lead to health problems.

There are a few things to keep in mind when determining the quality or purity of the water. Examples are; recent construction, location, maintenance, the water source, and any septic floods that could cause leakage into the well. These area contaminants vary upon location as well. Shute's Water systems have Ultraviolet filters, Chlorination and Filtration setup, and Carbon and Sediment filters. If water is determined to be hard, there are also conditioning treatments available, like; reverse osmosis, salt-based or salt-free, dual water tank softener, or a magnetic water descaler.

Shute's Water Systems can provide installation and maintenance on water pumps and storage systems. Any brand is available and can be maintained. However, a brand manufactured in the Auburn and Seneca area, Goulds, is a popular choice. In addition, Shute's Well Drilling is a fourgeneration business, with Mark and his son Jeff overseeing. Both experienced and reliable, the benefits of private well water can provide financial benefits, as well as cleaner water overall. Free from water bills, and the toxins public water can carry, Shute's Well Drilling installs quality wells for its customers. Their slogan is, "Quality Water From Your Well To Your Faucet!" Shute's Well Drilling is located on Highway 20, in Lafayette. They can be reached at (315) 952-4113. Shute's Water System is also located in Lafayette on 5684 Route 20. To schedule an appointment, they can be reached at (315) 677-5552.

s the holiday season approaches, there is no better time to support Alocal small businesses, especially those that care for your skin, body, and overall wellbeing.

When it comes to skincare, local Estheticians are trained to look beyond the latest trends and social media fads. We consider your unique skin type, lifestyle, and environment to create results that last. Investing in expert guidance from a professional who actually sees and touches your skin can save you time, frustration, and money in the long run. No more guessing which products might work or wasting money on half-used bottles.

But great skin does not exist in isolation. Our skin often reflects what is happening internally, which is why a holistic approach matters. Chiropractors, acupuncturists, massage therapists, and energy healers all play a role in supporting balance, stress relief, and circulation, all key factors in healthy, radiant skin.

If you are looking for meaningful gifts this season, consider a gift certificate to a local wellness professional. You will be giving more than a service; you will be giving rest, healing, and confidence.

By shopping local, you are not only investing in your skin's health but also nurturing the community that helps you glow from the inside out.

Also offer lumber, trusses,

doors, windows, steel and so much more. Please reach out for an estimate.

# CORTLAND COUNTY HISTORICAL SOCIETY TRIVIA DID YOU KNOW?

By Tabitha Scoville, CCHS Director

DID YOU KNOW THAT HOMER was once the site of the largest general store between Binghamton and Syracuse?

Jedediah Barber was born in Connecticut in 1787. At the age of 17, he traveled to Onondaga County with his cousin Joe Phelps who was joining his parents in Syracuse (this was 1804). The cousins traveled the 300 miles by "riding and tying." This meant that one of the young men would ride the horse for five miles and tie it to a tree and wait for the other fellow to catch up on foot. At that time, they would switch places.

Once in Syracuse, Barber worked for an area tavern keeper, and he taught school for about two years. He then went to work for a local merchant who invited Jedidiah to clerk in his Tully store. During this time, he managed to save up \$2,000. He married Matilda Tuttle in 1809, and soon they welcomed their first child. He decided to move to the growing village of Homer and open his own store there.

In 1811, Jedediah Barber built his store which he christened the "Great Western" after his trip west from Connecticut to Central New York. The building itself was 30 feet long and 22 feet wide. Often called the Walmart of its day, it was said that you could buy anything at the Great Western, and people would come in with challenges for Barber to test him. One gentleman visited the store and told Mr. Barber that he had heard that one could buy anything at the Great Western. Jedediah agreed with him that it was indeed true. The man then proceeded to ask to purchase a live toad...and this was in the middle of winter. Jedediah was nonplussed by the request and told the man to go into the cellar of the store and check in the southwest corner. There was a board about four feet long in the corner, and under that board would be a toad. The man did as Barber told him to do, and sure enough, there was a live toad!

Eventually the Great Western was destroyed by fire. Barber decided to rebuild, and today the Barber Block in Homer sits on the site of the legendary Great Western.

### **CREATURE FEATURE** RAISING THE ALARM

OODLAND CREATURES ARE PART OF a living acoustical network, connected to one another by sound. The atest "news" travels along this network, broadcasting important information including alarm calls and signals warning of potential danger - whether it's a hawk flying overhead, a coyote passing through, or just a hiker moving along a trail, these perceived threats trigger noisy bulletins that ripple through the forest.

If you've ever unintentionally flushed a white-tailed deer from its secretive resting place, you may have experienced a heartclutching moment as the startled animal blasted out a sharp, hoarse exhalation of air as it bounded away. These explosive warning snorts can carry far distances, triggering a cascade of reactions in other wildlife as agitated chipmunks, squirrels, crows, blue jays and other birds add their own acoustical warnings to the forest's "emergency broadcast system."

In addition to a warning blast, white-tailed deer also raise a visual alarm – quite literally. As they flee from predators, deer intersperse running with bounding leaps, while pumping their tails up and down, flashing white rumps and under-tails at the pursuer. Biologists speculate that these dramatic, flashy displays may serve multiple purposes including warning other deer of an immediate threat; communicating that they are healthy and vigorous individuals; and letting the predator know that it has been spotted. After all, many predators rely on stealth; so an in-your-face kind of retreat says, "Don't waste your time on me! I'm not an easy target, because I've already seen uou!"
